

AMENTYS SOURCE-AVAILABLE LICENSE (ASAL)

Copyright (c) 2026 Willy Micieli. All rights reserved.

PREAMBLE: THE AMENTYS PHILOSOPHY

Amentys is not a traditional operating system.

It is designed as an inseparable monolith, merging its kernel, storage system, and user interface into a single entity.

To prevent the fragmentation that divides software engineering (the "Linux syndrome"), this license explicitly prohibits the creation of derivative distributions (public "forks").

The goal is to focus the community's entire energy on a single, unified official system.

ARTICLE 1: FREE AND UNIVERSAL USE

This software is free by default.

The Original Author (Willy Micieli) grants any person (individuals, companies, institutions) the free, perpetual, and non-exclusive right to read, study, compile, and use the source code and the compiled software, without distinction between consumer and enterprise use, subject to compliance with all provisions of this License.

ARTICLE 2: PROHIBITION OF COMMERCIALIZATION AND COMMERCIAL HOSTING

Exclusive Rights: Only the Original Author holds the exclusive right to sell the software, derive direct financial profit from it, or offer it as a commercial service.

Prohibited Commercial Activities: It is strictly prohibited for any other natural or legal person to sell the original software, sell modified versions, or demand payment for access to this code or its derivatives.

Cloud, SaaS, and Hosting Restrictions: You may not provide the Software, whether modified or unmodified, as a commercial service, including but not limited to Software-as-a-Service (SaaS), Platform-as-a-Service (PaaS), Infrastructure-as-a-Service (IaaS), or managed hosting services, where the core value or functionality of the service is derived from the Software.

ARTICLE 3: ANTI-FRAGMENTATION POLICY (NO FORK)

To ensure the project's unity, the public distribution of modified, stripped-down, or derivative versions of Amentys is strictly prohibited.

You are not authorized to publish a public "fork" of the project (for example, by replacing the official interface with another, or by creating a separate distribution under a different name).

ARTICLE 4: INTERNAL MODIFICATIONS AND PRIVACY BOUNDARIES

Private Use: You are permitted to modify the source code for your strictly private and internal use, provided that such modifications are never publicly distributed.

Corporate and Enterprise Scope: For legal entities, "internal use" is strictly limited to deployments within the same legal entity, accessible only by its own employees and direct contractors for internal operations. Distribution or deployment to distinct legal entities, corporate affiliates, subsidiaries, external subcontractors, or third-party clients is considered public distribution and is strictly prohibited.

Contribution to the Common Good: If you develop a modification, improvement, or feature that you wish to make public, it **MUST** be submitted to the official Amentys repository (via a "Pull Request" or a patch). Any such public submission is automatically governed by the assignment of rights detailed in Article 5.

ARTICLE 5: ASSIGNMENT OF CONTRIBUTION RIGHTS AND WARRANTIES

Grant of Rights: By submitting a contribution (including but not limited to code, documentation, graphics, or design) to the official repository, the contributor grants the Original Author an irrevocable, worldwide, perpetual, non-exclusive, and royalty-free license to use, modify, integrate, distribute, sublicense, and commercialize that contribution within the scope of the Amentys project.

Contributor Warranty: The contributor warrants that they are the sole author of the contribution or possess all necessary legal rights and clearances to submit the contribution under these terms, ensuring it does not infringe upon any third-party intellectual property or open-source license.

ARTICLE 6: TERMINATION UPON VIOLATION

Any breach or non-compliance with any term, condition, or restriction of this License shall automatically and immediately terminate all rights granted to you hereunder, without prior notice or putting in default.

Upon termination, you must immediately cease all use of the Software and destroy all copies, modified or unmodified, in your possession.

ARTICLE 7: LIMITATION OF LIABILITY

THE SOFTWARE IS PROVIDED "AS IS," WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT. IN NO EVENT SHALL THE AUTHOR BE LIABLE FOR ANY CLAIMS, DAMAGES, OR OTHER LIABILITIES ARISING FROM THE USE OF THE SOFTWARE.

ARTICLE 8: TRADEMARKS AND VISUAL IDENTITY

This license does not grant any permission to use the trade names, trademarks, service marks, logos, or product names of the Original Author or the Amentys project, except as required for reasonable and customary use in describing the origin of the Software.

ARTICLE 9: PATENT LICENSE AND RETALIATION

Patent Grant: By contributing to the project, each contributor grants to the Original Author and to all users of the Software a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Software.

Patent Retaliation: If you or your legal entity initiate patent litigation against the Original Author or any other user claiming that the Software (including any contribution integrated into it) constitutes direct or contributory patent infringement, then any patent and software licenses granted to you under this License shall terminate automatically and immediately as of the date such litigation is filed.

ARTICLE 10: ATTRIBUTION AND COPYRIGHT NOTICES

Any copy of the Software, whether unmodified or modified for permitted internal private use, must retain this original license text, all copyright notices, and the name of the Original Author (Willy Micieli) intact within the source code.

ARTICLE 11: THIRD-PARTY COMPONENTS

The Software may bundle or rely on third-party libraries, modules, or drivers that are subject to separate, distinct open-source licenses.

Those third-party license terms govern the respective components exclusively and supersede this License solely regarding those specific external components.

ARTICLE 12: SEVERABILITY

If any provision of this License is held to be invalid, illegal, or unenforceable by a court of competent jurisdiction, such provision shall be modified to the minimum extent necessary to make it enforceable, or severed from this License if modification is not possible. The remaining provisions of this License shall remain in full force and effect.

ARTICLE 13: GOVERNING LAW AND JURISDICTION

This License shall be governed by and construed in accordance with the laws of France, without regard to its conflict of law principles. Any legal action, dispute, or proceeding arising under or in connection with this License shall be brought exclusively before the competent courts of France.

ARTICLE 14: AGE RESTRICTION AND MINOR USAGE LIABILITY

Adult Use Only: The Software is exclusively intended and designed for use by individuals who have reached the legal age of majority in their respective jurisdictions. It is not directed at, nor intended for, minors.

Transfer of Liability: The Original Author expressly disclaims any and all legal, financial, or administrative responsibility regarding the use of this Software by minors. This includes, but is not limited to, compliance with child protection regulations, data collection laws, or age verification mandates (such as COPPA, CalOPPA, CPRA, or the GDPR age of consent provisions).

OEM and Guardian Responsibility: Any distributor, Original Equipment Manufacturer (OEM), hardware vendor, or third-party entity pre-installing or selling systems equipped with the Software is strictly and solely responsible for verifying the legal age of the end purchaser. In the context of private, non-commercial use, this responsibility falls entirely upon the parents or legal guardians who grant a minor access to the Software. In the event of a breach, violation, or legal dispute relating to the age of the user, all liability rests exclusively with the distributor, vendor, or legal guardian, who agree to fully indemnify and hold harmless the Original Author.

ARTICLE 15: NON-EXTRACTION AND INDIVISIBILITY OF CORE TECHNOLOGIES

Indivisible Monolith: The Software is licensed as a single, highly integrated, and indivisible product. Its core technologies, subsystems, libraries, and proprietary engines—including, but not limited to, the jinshu architecture, the kpack system, the SemanticRouter, and the tiered CAS memory management—are fundamentally tied to the Amentys ecosystem.

Prohibition of Extraction (Anti-Poaching): You are strictly prohibited from decoupling, isolating, extracting, or reverse-engineering these specific internal components or technologies for the purpose of using them independently, integrating them into other operating systems, or packaging them as standalone libraries outside of the official Amentys environment.

Protection of Specific Innovations: Any attempt to strip the Software of its core innovations to power external projects, commercial or non-commercial, constitutes a direct violation of this License and an infringement of the Original Author's intellectual property.

ARTICLE 16: HARDWARE VENDOR COMPLIANCE AND ZERO BLACK-BOX POLICY

Declarative Hardware Interfaces (No Binary Blobs): To ensure absolute security and user sovereignty, Amentys does not permit the execution of closed-source, compiled binary drivers ("blobs") within its core architecture. Hardware manufacturers and Original Equipment Manufacturers (OEMs) wishing to interface with the Software MUST provide their hardware translation layers strictly as transparent, inert, and declarative semantic maps (Refraction Plans), as defined by the Amentys documentation.

Prohibition of Telemetry and Data Exfiltration: Hardware interfaces, drivers, and translation maps submitted by manufacturers must contain ZERO executable logic capable of intercepting, storing, or transmitting user data (e.g.,

keystrokes, framebuffers, audio streams, memory states). Any inclusion of telemetry, spyware, or undocumented data exfiltration mechanisms constitutes a severe breach of this License.

European Sovereignty and Strict Liability: If a hardware partner or manufacturer intentionally or negligently introduces malicious logic or hidden surveillance capabilities into their Amentys-compatible interface, they will be held strictly liable under European cybersecurity and data protection laws. The Original Author and the governing legal entity (SASU) reserve the right to immediately revoke the manufacturer's certification, block their hardware components across the Amentys ecosystem via semantic blacklisting, and seek unlimited financial damages for breach of trust and ecosystem endangerment.
